## *Vintage*

Scarce rainfall during the frost-free winter months. Well distributed spring rains during April and May. Varaison took place mid-August 10 days later than the 2007 vintage. Dry summer with mild temperatures, a harvest which started progressively on 19<sup>th</sup> of September with hot days and cool nights.

## *Profile*

In a continental vintage of slow maturation and marked contrasts in temperatures, Prima has an impenetrable colour, intense and powerful in aromas with a suggestive minerality and bright red fruit.
